**Subject:** Energy East Pipeline Project (the Project) Scope, Amendment Filing and Supplemental Report | Portée du Projet Oléoduc Énergie Est (le Projet), dépôt de l'amendement et du rapport complémentaire

Dear Sir/Madam:

On Thursday, November 5, 2015, Energy East Pipeline Ltd. (Energy East) announced changes to the scope of its project. The related news release is attached for your reference.

Energy East will file an amendment with the National Energy Board (NEB) to reflect these changes from the original project application that was filed with the NEB on October 30, 2014. Energy East will also continue to file quarterly supplemental reports that include updated information reflecting the Project's ongoing engagement program and activities. The amendment and the next supplemental report will be submitted to the NEB by the end of 2015.

This updated information will be made available on the NEB website, [www.neb-one.gc.ca](http://www.neb-one.gc.ca), where you can also find the original application and supplemental reports filed to date under "Quick Links". The NEB website also provides information about the regulatory process, including next steps.

In addition, the amendment and supplemental report will be available on the Energy East websites in both English and French at <http://www.energyeastpipeline.com> and <http://www.oleoducenergieest.com>, respectively.

Sincerely,

The Energy East Stakeholder Relations Team

Madame, Monsieur,

Le jeudi 5 novembre 2015, Oléoduc Énergie Est Ltée (« Énergie Est ») a annoncé des changements à la portée de son projet. Vous trouverez ci-joint le communiqué de presse à ce sujet, aux fins de consultation.

Énergie Est déposera un amendement auprès de l'Office national de l'énergie (ONÉ) qui reflétera ces changements apportés à la demande initiale du projet, soumise à l'ONÉ le 30 octobre 2014. Énergie Est continuera également de soumettre des rapports complémentaires trimestriels qui comprendront des informations à jour sur le programme et les activités de participation au Projet. L'amendement et le prochain rapport complémentaire seront déposés à l'ONÉ d'ici la fin de 2015.

Les informations mises à jour seront disponibles sur le site de l'ONÉ, au [www.neb-one.gc.ca](http://www.neb-one.gc.ca), sous la rubrique « Liens Rapides ». Vous pourrez également y trouver la demande initiale, de même que les autres rapports complémentaires soumis jusqu'à présent. Le site de l'ONÉ renferme aussi des informations sur le processus réglementaire, y compris les étapes à venir.

De plus, l'amendement et les rapports complémentaires seront disponibles en français et en anglais, sur les sites Web d'Énergie Est, au [www.oleoducenergieest.com](http://www.oleoducenergieest.com) et au [www.energyeastpipeline.com](http://www.energyeastpipeline.com), respectivement.

Cordialement,

L'équipe des relations avec les parties prenantes d'Énergie Est

**Re: Energy East Pipeline Project (the Project) Scope, Amendment Filing and Supplemental Report**

On Thursday, November 5, 2015, Energy East Pipeline Ltd. (Energy East) announced changes to the scope of its project. The related news release is attached for your reference.

Energy East will file an amendment with the National Energy Board (NEB) to reflect these changes from the original project application that was filed with the NEB on October 30, 2014. Energy East will also continue to file quarterly supplemental reports that include updated information reflecting the Project's ongoing engagement program and activities. The amendment and the next supplemental report will be submitted to the NEB by the end of 2015.

This updated information will be made available on the NEB website, [www.neb-one.gc.ca](http://www.neb-one.gc.ca), where you can also find the original application and supplemental reports filed to date under "Quick Links". The NEB website also provides information about the regulatory process, including next steps.

In addition, the amendment and supplemental report will be available on the Energy East websites in both English and French at <http://www.energyeastpipeline.com> and <http://www.oleoducenergieest.com>, respectively.

Sincerely,

The Energy East Stakeholder Relations Team

## Energy East Remains Safest Way of Transporting Crude Oil to Market

### *TransCanada Listens, Removes Québec Port from Project Scope*

CALGARY, Alberta – November 5, 2015 –TransCanada Corporation (TSX, NYSE: TRP) (TransCanada) today announced adjustments to the Energy East Pipeline Project after continuing to listen to local communities, key stakeholders and its customers. The company will be amending the Energy East application before the National Energy Board to remove a port in Québec from the scope of the project. TransCanada remains committed to ensuring a Canadian crude oil supply connection to the Suncor and Valero (Jean Gaulin) refineries in Québec, helping to minimize the pipeline's impact on the environment while continuing to focus on pipeline safety and maximizing the project's economic benefits for Canadians.

"Today's announcement demonstrates our dedication to listening and delivering a vital infrastructure project that will provide significant economic benefits to all provinces along the pipeline's route," said Russ Girling, TransCanada's president and chief executive officer. "We will do this while maintaining our commitment to environmental stewardship and the safe, responsible development of this pipeline. We have demonstrated for more than 60 years that TransCanada has the expertise and commitment to build safe and reliable pipelines to better serve Canadians.

"Pipelines remain the safest and least GHG-intensive way of transporting crude oil to market," added Girling. "By approving and building the Energy East Pipeline we will create the capacity to displace the equivalent of 1,570 rail cars of crude oil per day to Eastern Canada."

A recent study supports this point by concluding that Energy East would change the mode of transport of crude oil already produced from rail to pipeline (*Navius Research, Report to the Ontario Energy Board, August 2015.*)

Girling points out that once the crude oil makes its way to market, Energy East will directly connect with refineries in Québec and New Brunswick, allowing them access to a secure and less expensive Western Canadian crude oil supply.

Thousands of men and women will be employed in the design and construction of this important infrastructure project. According to a Conference Board of Canada study published late last year, the Energy East project is expected to support an average of 14,000 direct and indirect full-time jobs annually across Canada during development and construction and generate more than \$7 billion in additional tax revenues for governments over the next 20 years, along with approximately \$36 billion in GDP for Canada.

- Over 4,000 jobs annually in both Québec and Ontario during development and construction, in addition to \$2.6 billion in tax revenues for Ontario and \$2 billion for Québec
- Close to 3,000 jobs on the Prairies and more than 2,300 jobs in New Brunswick that will be created each year during development and construction of the pipeline in addition to hundreds of millions of dollars in tax revenues for local communities for years to come
- Other benefits outside of the Conference Board data include 250 jobs that were previously announced for GE Canada in Peterborough to build electric motors for the project
- \$30 million invested in Ontario to-date to support Energy East development
- \$100 million in signed contracts in Québec with more than 250 suppliers in the past three years

TransCanada will be sending the NEB amendments to the Energy East application, including the addition of today's changes, in the fourth quarter of 2015. The change in project scope and further refinement of the project schedule is expected to result in an in-service date of 2020, subject to receiving the necessary regulatory approvals and permits.

The 1.1 million barrel per day (bbl/d) Energy East project is an important element of TransCanada's \$47. billion of commercially secured growth initiatives. Over the remainder of the decade, subject to required approvals, this industry-leading portfolio of contracted energy infrastructure projects is expected to generate significant growth in cash flow, earnings and dividends.

With more than 65 years' experience, TransCanada is a leader in the responsible development and reliable operation of North American energy infrastructure including natural gas and liquids pipelines, power generation and gas storage facilities. TransCanada operates a network of natural gas pipelines that extends more than 68,000 kilometres (42,100 miles), tapping into virtually all major gas supply basins in North America. TransCanada is one of the continent's largest providers of gas storage and related services with 368 billion cubic feet of storage capacity. A growing independent power producer, TransCanada owns or has interests in over 10,900 megawatts of power generation in Canada and the United States. TransCanada is developing one of North America's largest liquids delivery systems. TransCanada's common shares trade on the Toronto and New York stock exchanges under the symbol TRP.
